Equipment Information

Air Conditioners CHECK TYPE: Central AC (split system) Single Package AC

AHRI Reference Number	Brand	Model Number	Serial Number	Coil Model No.	SEER	EER	IEER	Cooling Capacity (Btuh)	Tons*

*Round unit tons to nearest 0.1 tons (Divide Btuh by 12,000 to get tons) before adding to get totals.

ECM Fan Motor Replacements

Brand	Model Number	Serial Number	Horsepower

Attach all equipment worksheets, specifications and copy of sales invoice.

Use "Commercial Equipment Worksheet - Air Conditioners" for more than 4 units. CHECK HERE IF WORKSHEET ATTACHED

Customer and Vendor Agreement

By signing below, Customer and contractor/vendor agree to the Terms and Conditions (see back or separate page) for this program.

Customer Name/Title		Contractor/Vendor Name/Title	
Customer Signature	Date	Contractor/Vendor Signature	Date
Office Use Only:		Notes:	Authorized Amount
Utility ID	Employee Name		

Incentive Summary	
AC Equipment Rebate	Tons* x \$25 =
ECM Fan Motor Rebate	Units x \$75 =
TOTAL REBATE =	

*Round to nearest whole tons.
NOTE: Include total tons and units from any worksheets.

Maximum Rebate per facility is \$10,000

Terms and Conditions - Commercial Air Conditioning Incentives

Program Offer: The Program covers products purchased and/or services rendered on or after **January 1, 2018**.

Equipment and Installation Eligibility Requirements:

1. All air conditioners must be ENERGY STAR® labeled and meet current Energy Efficiency Criteria for ENERGY STAR qualified air conditioners. Current ENERGY STAR information, specifications and qualifying equipment list can be found at <http://www.energystar.gov>.
2. The following energy efficiency minimums shall be required to receive a rebate:

MINIMUM Energy Efficiency Criteria for ENERGY STAR Qualified Residential Type Air Conditioners (effective 9/15/15)		
Product Type	SEER	EER
Central Air Split Systems	15.0	12.5
Single Package Air Conditioner	15.0	12.5

MINIMUM Energy Efficiency Criteria for ENERGY STAR Qualified Light Commercial Air Conditioners (effective 5/1/10)		
Product Type	SEER	EER
Split System (3-phase) <65,000 Btuh	14.0	12.0
Single Package (3-phase) <65,000 Btuh	14.0	11.0
All Air Conditioners ≥65,000 and <240,000 Btuh		
Electric resistance or no heating	11.8 IEER	11.7
All other	11.6 IEER	11.5

3. The minimum efficiencies shown on this form are values required for ENERGY STAR qualified equipment at the time this form was published. The Customer is responsible to ensure that their system meets the current ENERGY STAR criteria in effect at the time of installation.
4. When installing a split system, both a new outdoor unit (condenser) and a new indoor A-coil (evaporator) must be installed.
5. Rebates for air conditioners are based on cooling tons. The capacity for units is rated in the AHRI Unitary Directory by its output in "Btuh." This amount must be divided by 12,000 to determine the number of tons.
6. Single package units (compressor/blower combination units) must utilize electricity as the source of heating. These units are often installed on a slab or roof.
7. Electronically Communicated Motor (ECM) rebate is available when changing out a non-ECM fan motor to an efficient ECM motor of the appropriate size.
8. ECM rebates are only available for fans used with central cooling systems with a capacity of 8 tons or less.

IMPORTANT NOTE: ENERGY STAR labels on equipment do not guarantee that products qualify for this incentive. (Refer to requirements 1-3 above).

General Terms and Conditions

Rebates shall be pro-rated based on the percent of power supplied by the utility if the customer has distributed generation.

Application Information: Missing or incorrect information on the application may delay processing and delivery of the rebate. An invoice is required and should include specific product information, including the brand, model, serial number and date of purchase of the energy efficient measures. Other information including manufacturer's equipment performance sheets may be required upon request.

The Utility reserves the right to verify sales transactions and to have reasonable access to the Customer's facility to inspect pre-existing equipment (if applicable) and energy efficient measures installed under this program.

Warranty Information: The Utility makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Utility does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

Limitation of Liability: The Utility's liability in connection with this program is limited to paying the rebate specified when all terms and conditions have been satisfied. Under no circumstances shall the Utility be liable for any consequential or incidental damages or tax liability resulting from participation in this program.

Participant Certification: Participating Customer certifies that he/she purchased and installed the equipment listed on their application at the defined location served by the Utility. The Customer agrees that all information provided is true and that he/she has conformed to all program requirements. If the equipment and application does not comply with the Utility's rules and qualifications, the rebate amount may be denied or adjusted.

Program Changes/Termination: The Utility reserves the right to extend, modify (including incentive levels) or terminate this Program at any time without prior or further notice. The Customer is responsible for checking with the Utility to determine whether the program has been changed or is still in effect.

Customers must apply for rebates within six (6) months of the purchase date (as shown on the Customer's invoice). Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.
