CREATE A HEALTHY HOME

Keep it Safe	
Properly label and store poisons out of the reach of children. Secure loose rugs and keep children’s play areas free from hard or sharp surfaces. Install smoke and carbon monoxide detectors and keep fire extinguishers on hand.	
Keep it Well-ventilated	
Ventilate bathrooms and kitchens; consider using whole house ventilation to supply fresh air and reduce the concentration of contaminants in the home.	

Keep it Contaminant-free
Reduce lead-related hazards in pre-1978 homes by fixing deteriorated paint, and keeping floors and window areas clean using a wet-cleaning approach. Test your home for radon, a naturally occurring dangerous gas that enters homes through soil, crawlspaces, and foundation cracks. Install a radon removal system if levels above the EPA action-level are detected.
Thermally Controlled
Houses that do not maintain adequate temperatures increase the risk for inhabitants to be exposed to extreme cold or heat.
