**ON THE COVER**

Ellie Bockenstedt (*left*) and Addy Kirby were students of Edgewood-Colesburg High School's 2020 digital multimedia marketing class taught by Jodi Ehlers. The class partnered with Edgewood Locker on real-world marketing activities, such as creating a fundraising brochure. The work inspired several students to take an advanced foods class where they grilled meat and staged food for marketing photography. Cassidy Steger, a fellow student and high school junior at the time, took the photos (including our cover image) and runs her own photography business, Cassidy Leigh Photography. Read more about local meat lockers on Pages 10-12 of this issue. ⚡

# There's no such thing as a free dinner: Beware of energy claims that sound too good to be true

BY CHUCK SODERBERG

*"Save 50% on your energy bills!"*

*"Stop paying your electric utility!"*

*"Save thousands on your heating and cooling costs!"*

Have you ever received a postcard or an email featuring one of these headlines? The postcard usually includes an invitation to a free dinner at a local restaurant where you can learn more about how to "save big" on your energy bills. There's even a local phone number you can call to reserve your spot, causing you to think that a reputable, local company is organizing this effort. It almost always is not.

As we move beyond the pandemic, these types of invitations will likely increase in our communities. It's easy to let our guard down because we want to believe the incredible claims we find in our inboxes and mailboxes. These dubious marketing campaigns will tout power converters for your meter, radiant barriers for your attic and other technologies that promise to save you hundreds or thousands of dollars on your energy bills.

Often, there is some truth to the technology and products being pitched in these postcards. For example, an aluminum radiant barrier placed in your attic can help reduce heat gain during the summer, but the efficiency claims are often overstated, and the product is often overpriced.

## Research the company

Before accepting an invitation or signing a long-term contract or financing program, please research the company on the Better Business Bureau website at [www.bbb.org](http://www.bbb.org). We also encourage you to contact your local electric co-op and speak to their member services department about the offer. As a reliable source

of information you can trust, your local co-op can answer your energy efficiency questions and suggest practical ways to save energy and money on your electric bills.

Locally owned and governed by the member-consumers we serve, Iowa's electric cooperatives fully support energy efficiency efforts. In fact, your local co-op offers several incentives, rebates and programs that can lower your electric bill. We can also provide information about which energy efficiency products may qualify for state or federal tax credits. Our priority is to make sure you're not tricked into spending your hard-earned money on products that don't work as

advertised. Be wary of exaggerated claims and overpriced products in these free dinner schemes.

## Resist pressure tactics

And if you do accept an invitation to a free dinner, don't feel pressured to make a purchase or sign on the dotted line until you've had time to research the company and the claims it is making. Any reputable business would encourage you to take the time you need to make an informed decision.

Please beware of these invitations – the actual cost of your free dinner could be more than you're willing to pay. ⚡

Chuck Soderberg is the executive vice president and general manager of the Iowa Association of Electric Cooperatives.

## EDITOR'S CHOICE CONTEST

### Win a Cuisinart electric smoker!

This electric smoker is perfect for backyard barbecues! A spacious 548-square-inch interior means there is plenty of room to smoke a variety of Iowa-raised meats and fresh vegetables, with 1500 watts of heat to produce temperatures from 100 degrees F to 400 degrees F. The 30-inch vertical footprint makes it a perfect size for patios and decks. Three stainless steel racks can be easily removed for smoking large cuts of meat, and an easy-to-read thermometer on the front door makes monitoring internal temperature convenient. ⚡

### Visit our website and win!

Enter this month's contest by visiting [www.livingwithenergyiniowa.com](http://www.livingwithenergyiniowa.com) no later than June 30, 2021. You must be a member of one of Iowa's electric cooperatives to win. There's no obligation associated with entering, we don't share entrant information with anyone and multiple entries from the same account will be disqualified. The winner of the \$100 Earl May Garden Center gift card from the April issue was Monte Eggers, Grundy County Rural Electric Cooperative.

OPERATIONS UPDATE

# The upswing slide into summer

BY ELDEN WOLFE

The line crew here at Guthrie County REC is ramping up for the summer season and all that comes with it. On good days, we get to work outside under the sun and go home to our families. On challenging days, we're working on storm cleanup, restoring power and facing long hours away from home. Both types of days are part of the job we love.

electric load. This work includes updating and replacing the highside switch and breaker bypass switches – technical terms for ways we can protect and control the power coming through the substation.

Finally, in July, we plan to test new oil circuit reclosers (OCRs) at both the Panora and Diamondhead substations. OCRs act like circuit breakers

at home by shutting off the power when trouble occurs. The benefits of upgrading this equipment are fewer prolonged outages and automatic power restoration, saving time and the expense of having GCREC crews visit the site to manually inspect and repair.

At this halfway point of our operations year, we continue to check off the boxes for the goals we set. The line crew works hard, every day, on behalf of our member-consumers to provide the electricity you depend on. The reward is returning home safely at the end of the day to enjoy the fun sides of summer. We hope you have a wonderful summer as well. ⚡

Elden Wolfe is the line superintendent for Guthrie County REC.

Accordingly, we forge on with our projects to improve the electric distribution system that provides your power. By the end of summer, we will have rebuilt seven miles of line around the Woodward substation, seven miles of line around the Perry substation, six miles of line around the Panora substation and five miles of line around the Yale substation. At the beginning of the year, our goal was to rebuild 20 miles of line and we are on track to surpass this goal. Rebuilding line is an important part of what we do because it improves the reliability of the power you receive from Guthrie County REC.

Another important project is our work to convert our Perry substation to 69 kV to better handle increasing

# Congratulations, 2021 scholarship recipients!

Guthrie County REC is pleased to announce the 2021 scholarship recipients. These three bright students who reside within the cooperative's service territory will each receive \$1,000 toward their educational goals.

## Ella Waddle Panorama

Ella is the daughter of Jaime and Brandon Waddle of Panorama. She will attend Iowa State University to pursue a biology major. After completing her bachelor's degree, Ella wants to become a clinical laboratory scientist. She hopes her profession will allow her the opportunity to be involved with finding a cure for cancer. During high school, Ella was involved in STEM activities and competed in a TEAMS (Test of Engineering

Aptitude, Mathematics and Science) group that ranked second in the state. She also worked as a groundskeeper, soccer referee, babysitter and dog sitter throughout her high school career.

## Rylee Sloss AC/GC

Rylee is the daughter of Carrie and Darin Sloss of Guthrie Center. She will attend Iowa State University to pursue a degree in Agriculture Studies, where she plans to continue growing her knowledge of agriculture and the beef industry. Rylee operates a cow/calf partnership with her brother on her grandpa's farm, where her love of agriculture developed. During high school, Rylee has worked for Dowd Drug and participated in various activities, including 4-H, FFA, cross country and track,

speech, Guthrie County Fair Queen and Guthrie County Beef Princess.

## Cassidy Baker Coon Rapids-Bayard

Cassidy is the daughter of Jessica and Rich Baker of Coon Rapids. She will attend Northern Arizona University in Flagstaff, Arizona, to pursue a bachelor's degree in biology and music minor. After college, Cassidy hopes to find a successful career that she genuinely loves and to make a difference in the world, whether it be big or small. During high school, Cassidy was involved in volleyball, swim team, track, softball, National Honor Society, FFA, Student Council and choir. Cassidy is looking forward to experiencing the world in this next chapter of life by traveling abroad during college. ⚡

## TECHNOLOGY MATTERS

# Is an electric mower right for you?

The electric lawn mower industry is growing in a way that's beginning to give traditional gas-powered mowers a run for their money. If you're in the market for a new mower this season, you'll likely see that there are plenty of gas-powered models on display, but there are also a growing number of electric mowers available to purchase.

So which is right for you? To answer that question, here are some things to consider about electric mowers before purchasing one.

- **Volume.** Electric mowers are significantly quieter than gas mowers and can be less disruptive to nearby neighbors.
- **Maintenance.** Electric mowers far outshine gas mowers when it comes to maintenance. No spark plugs, oil or air filters or other annual maintenance is needed.
- **Weight.** Electric lawn mowers are lighter than their gas-powered siblings and are therefore much easier to maneuver.
- **Better for the environment.** The Electric Power Research Institute

notes that if we replaced half the gas-powered lawn mowers with electric ones, it would reduce the same amount of emissions as removing 2 million vehicles from the road.

- **Shorter run times.** If your yard is more than half an acre, then an electric model might not be the right choice. Average battery life is between 20-45 minutes, meaning if you can't mow your entire yard within that time, you'll likely have to stop and wait for a recharge or purchase an additional battery.
- **Not as powerful.** Electric lawn mowers generate substantially less torque on average than gas mowers, making them less effective at tackling long grass or challenging terrains like hills or dips. ⚡

# Drilling down — four efficient cordless tools for dad

BY PAT KEEGAN AND BRAD THIESSEN

A cordless drill is one of the handiest tools for home projects.

With Father's Day this month, you might be thinking about buying some rechargeable power tools for the dad in your life whether that's your husband or father.

If your loved one enjoys tackling home projects, rechargeable tools are an excellent gift idea.

Rechargeable cordless tools are worth the investment when the corded version is the least convenient option. For example, a power drill is something you usually move around with and often use outside, so a cordless drill is much more convenient and a worthy investment. On the other hand, a table saw is usually not the first choice for cordless tools because it doesn't need to be moved repeatedly during a home project.

Quality cordless tools are usually less expensive if you buy them as part of a set instead of one tool at a time. And you can't typically mix and match between brands because each line of tools uses a unique battery. So, it may cost less in the long run to buy a cordless starter kit with a few helpful tools and a battery, then add tools to the set as needed.

Here are a few cordless tools that the father in your family will love!

## 1 Power drill

As one of the most-used power tools, a drill should be everyone's first cordless tool. Using a corded drill can mean constantly moving the cord around furniture, other tools

or your own feet, which can be dangerous. Cordless drills are easy to use, and the technology has improved so they have more power and hold a charge longer. Light-duty drills are smaller and less powerful but easy to use for smaller projects.

## 2 Leaf blower

If the father in your family uses a gas-powered leaf blower, you can do him (and your neighbors!) a favor by giving him a cordless leaf blower. This option is more energy efficient, much quieter and less polluting.

## 3 String trimmer

A string trimmer is a quick way to trim weeds and grass

# 2

near walls, bricks and rocks. If your family uses an outdated gas trimmer around the yard, it's time for a change. Two-stroke engines pollute the air and require regular maintenance. Electric trimmers are more energy efficient and quieter. You can find a variety of models between \$50 and \$150, and it's worth paying a little more to get a highly rated model that will last longer.

## 4 Flashlight

Today's LED technology is amazing – LED flashlights can produce 20 times as much light as incandescent ones. And they come in a variety of options, from tiny key chain lights

to headlamps to waterproof spotlights. A flashlight can usually give better light than a cell phone, especially if you're working in a tight space like under a sink. A flashlight often comes as part of a cordless tool set, or you can buy a single unit that recharges using a USB port on a charger, USB wall socket or mobile phone battery.

Batteries make cordless tools possible. Lithium-ion batteries are more expensive, but they're gaining popularity because they hold a charge longer. While they hold a longer life, they still degrade over time and may need to be replaced in about three years.

It's worth buying a reputable brand of cordless tools so you can be

confident you will be able to find a replacement battery. Lithium-ion batteries should not be disposed with trash because they are a fire hazard and contain toxic chemicals. Your local waste disposal service can provide information on how to dispose of these batteries properly.

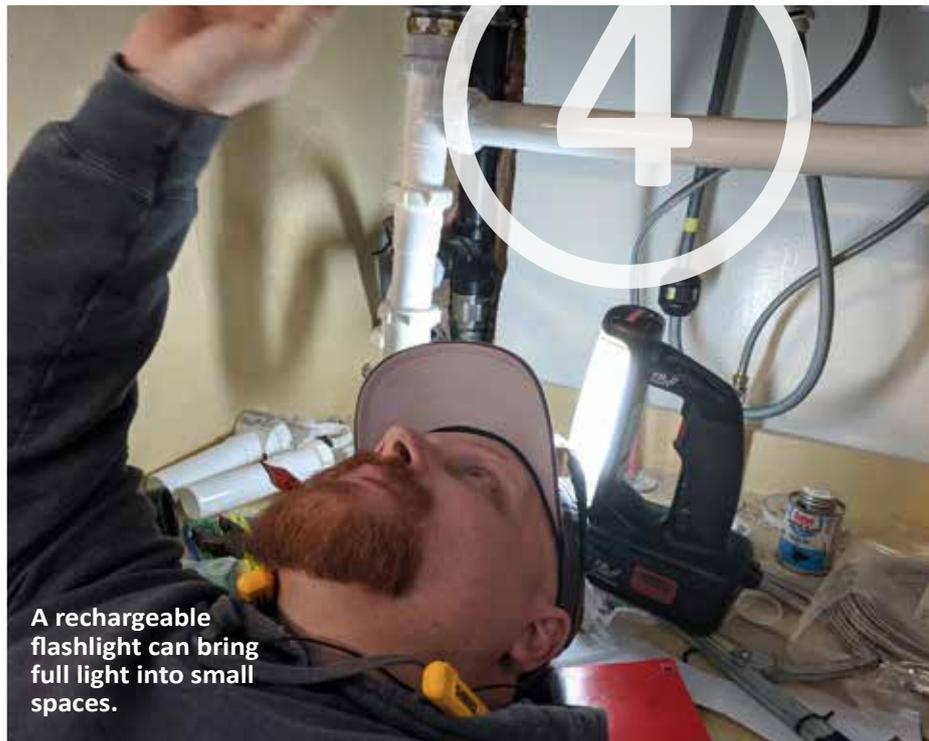

It goes without saying, but these cordless tool gift ideas aren't just for dads or Father's Day. All DIY enthusiasts would enjoy any of these gifts any time of the year and hopefully put them to good use! ⚡

Pat Keegan and Brad Thiessen of Collaborative Efficiency write on energy efficiency topics for the National Rural Electric Cooperative Association, the national trade association representing more than 900 local electric cooperatives.

A rechargeable string trimmer is quieter and more energy-efficient than a gas-powered model.

VEGETABLE & FRUIT

## RECIPES

### Green Beans and Bacon

- 2½ pounds green beans, trimmed kosher salt**
- ½ pound bacon, roughly chopped**
- 1 small onion, finely chopped**
- 3 cloves garlic, minced**
- 1 teaspoon red pepper flakes**
- juice of ½ lemon**
- freshly ground pepper**
- salt, optional**

Add green beans to a large pot of boiling salted water. Cook until bright green in color and crisp-tender, about 5 minutes. Drain, then shock green beans in a large bowl of ice water to stop the cooking. Drain again, pat dry, then set aside. Cook bacon in a large, heavy sauté pan until crisp, about 5 minutes. Remove bacon and place on a paper-towel lined plate to drain. Spoon off excess grease from the pan, leaving 2 tablespoons. Add onion and sauté until soft, about 4-5 minutes. Sprinkle in garlic and red pepper flakes and sauté 1 minute. Add green beans and cook until heated. Return bacon to the pan. Add lemon juice, pepper and salt, if desired. Stir well. *Serves 6-8*

**Kathleen Steele • Hedrick**  
Access Energy Cooperative

### Fresh Basil Cucumber Salad

- 1 English cucumber, diced**
- 2-3 Roma tomatoes, cubed**
- ¼ cup fresh basil, chopped**
- 1 cup bread cheese, cut into small cubes**
- 2-3 tablespoons olive oil**
- Himalayan salt**
- pepper**

In a bowl, combine the cucumber, tomatoes and basil. On medium-low heat, warm cubed bread cheese until hot. Once hot, add to veggies. Drizzle with olive oil, add salt and pepper to taste and blend. Best served while cheese is hot. *Serves 3-4*

**Amy Rudolph • Renwick**  
Boone Valley Electric Cooperative

### Awesome Marinated Tomatoes

- 1 pound cherry tomatoes, halved or quartered**
- 1 tablespoon garlic, minced**
- ½ green pepper, diced (more if you prefer)**
- 2 tablespoons olive oil**
- ½ tablespoon cilantro**
- ½ tablespoon parsley**
- ½ tablespoon lemon juice**
- ½ tablespoon lime juice**
- salt and pepper, to taste**

Toss all ingredients together. Refrigerate for 2-3 hours, or 24 hours for full flavor.

**Becky McClenathan • Toledo**  
T.I.P. Rural Electric Cooperative

### Grandma's Pasta Salad

- ½ pound spaghetti**
- 1 onion, chopped**
- 1 green pepper, chopped**
- 1 cup celery, chopped**
- 7 grape tomatoes, chopped**
- 1 cup fresh peas**
- 1 cup cheese, shredded**
- 8 ounces creamy Italian dressing**
- ⅓ cup sugar**
- 1 teaspoon dry mustard**

In a large bowl, combine cooked spaghetti, vegetables and cheese. In a separate bowl, mix Italian dressing, sugar and mustard then pour over salad. Cover and chill.

**Marlene Burns • Swisher**  
T.I.P. Rural Electric Cooperative

**Fresh Facts Source:**  
Iowa State University  
Extension and  
Outreach, Spend  
Smart. Eat Smart.

#### RIPEN TO SWEETEN

Avocados, unripe melons and tree fruits (pears, plums, peaches and nectarines) should be kept at room temperature to ripen and become sweeter. Once fully ripened, store in the refrigerator until you are ready to eat them.

## Carrot Raisin Salad

- 4 cups carrots, shredded (4-5 large)
- $\frac{3}{4}$ -1 $\frac{1}{2}$  cups raisins
- $\frac{1}{4}$  cup Miracle Whip
- 2 tablespoons sugar
- 2-3 tablespoons milk

Combine carrots and raisins in a bowl. In a separate bowl, mix remaining ingredients, then spread over carrots and raisins. Mix thoroughly.

Sonya Colvin • Ames • Consumers Energy

## Blackberry Salad

- 3 ounces cherry Jell-O
- 1 cup boiling water
- 1 cup blueberry yogurt
- 1 tablespoon lemon juice
- 1 cup fresh blackberries

Dissolve Jell-O in boiling water. Add yogurt, lemon juice and blackberries. Mix and refrigerate for 30-60 minutes. *Serves 4*

Deanna Foreman • Rock Valley  
North West Rural Electric Cooperative

## Cucumber Salad

- 1 cup mayonnaise or salad dressing
- $\frac{1}{4}$  cup sugar
- 4 teaspoons vinegar
- $\frac{1}{2}$  teaspoon dill weed
- $\frac{1}{2}$  teaspoon salt, optional
- 4 medium cucumbers, peeled and sliced thin
- 3 green onions, chopped

Combine mayonnaise, sugar, vinegar, dill and salt. Mix well, then toss in cucumbers and onions. Cover and chill for at least 1 hour. *Serves 8*

Esther Miller • Alford • Lyon Rural Electric Cooperative

## Sautéed Summer Squash

- 2 tablespoons canola oil
- $\frac{1}{4}$  cup onions, diced
- $\frac{1}{4}$  cup green peppers, diced
- $\frac{1}{4}$  teaspoon Italian seasoning
- $\frac{1}{4}$  teaspoon salt
- $\frac{1}{2}$  teaspoon garlic salt
- 4 cups zucchini and summer squash, sliced  $\frac{1}{4}$ -inch thick
- 2 tablespoons water
- 1 cup mozzarella cheese, shredded

Add oil to a large skillet. Sauté onions and green peppers with Italian seasoning and salts until the vegetables are tender. Add zucchini, summer squash and water. Cover and cook over low heat for 15 minutes, or until squash is tender. Top with cheese. Keep on low heat until the cheese melts. Serve immediately. *Serves 4-6*

Gloria Moser • Larchwood  
Lyon Rural Electric Cooperative

## Angel Food Strawberry Dessert

- 1 small package strawberry Jell-O
- 1 tablespoon lemon juice
- 1 cup boiling water
- 1 cup cold water (can have ice in it)
- 2 cups whipped topping
- 4 cups angel food cake, torn into pieces
- 2 cups strawberries

Dissolve Jell-O and lemon juice in boiling water. Add cold water to thicken (can be refrigerated to help thicken). Once thickened, whip Jell-O until light and fluffy. Fold in whipped topping, angel food cake pieces and strawberries. Add mixture to a 9x13-inch pan. Chill before serving. *Serves 12*

Karen Heiden • Dows • Prairie Energy Cooperative

### STORE IN CRISPER DRAWER

Keep your refrigerator at or below 40 degrees F and use the crisper drawer for produce when possible.

FRESH FACTS

### STEM SIDE DOWN

Tomatoes will keep longer when stored stem side down.

FRESH FACTS

### REFRIGERATE CUT PRODUCE

Any cut produce must be refrigerated to prevent foodborne illness.

FRESH FACTS

### USE RUNNING WATER

Wash produce under running water rather than putting it in a container of water. This increases the likelihood of washing away potential contaminants.

### WASH ALL PRODUCE

Wash all produce before you eat it. Even fruits that have thick peels, such as oranges, bananas and melons, should be washed.

FRESH FACTS

# Iowans get creative to sell local

BY KAY SNYDER

Farmers, agribusinesses and meat lockers innovate to meet consumer demand

Nothing says summertime like pork chops or ribeye steaks sizzling on the grill! With grilling season in full swing, Iowans are sure to find high-quality and flavorful protein options no matter if they shop at the grocery store, local meat locker or purchase from a neighboring farmer.

The movement to “buy local” foods – especially meat – skyrocketed when the COVID-19 pandemic hit and consumers were preparing more of their own meals. The increased demand for animal protein exposed gaps in meat processing systems, causing the traditional farm-to-fork cycle to derail. There wasn’t a shortage of livestock; the supply chain was disrupted by worker shortages at processing facilities due to the pandemic. As a result of the disruption, food insecurity increased and consumers wanted more control over the source and supply of their food. The trend to buy local is expected to continue throughout 2021 and beyond.

Iowa’s livestock farmers lead the nation in pork production and are in the top 10 states for beef production. Globally, Iowa meats are recognized as the standard of high quality and flavor. With the challenges large meat processing plants faced during 2020, Iowans turned their attention to sourcing meat from small local lockers.

In general, local demand for meat has far outweighed capacity. Local meat lockers – many in electric cooperative-served areas – have developed unique offerings and business model responses to strengthen Iowa’s overall food processing supply chain, support rural communities and help meet consumer demand.

## Expansions in Edgewood

Edgewood Locker is embarking on the construction of a 19,000-square-foot facility in Edgewood. The additional space will help satisfy demand from wholesale and retail customers. It is expected to quadruple the volume of wholesale

business, increasing the production of products such as jerky, sausage and more. As of early this year, Edgewood Locker’s processing capacity for individual farmer-owned beef was sold out through 2021 and 2022. Owners expect the new facility to open sometime next year and anticipate adding 14 full-time jobs for the community.

Central Iowa Power Cooperative has applied for possible U.S. Department of Agriculture (USDA) support of this project. Maquoketa Valley Electric Cooperative, Allamakee-Clayton Electric Cooperative and Dairyland Power also offered to provide support from their revolving loan funds, if needed.

## New opportunities in Camanche

Naeve Family Beef in Camanche plans to construct a 14,000-square-foot, state-of-the-art processing and packaging facility this year. The startup company will provide locally raised protein products to local consumers, retailers, restaurants,

grocery stores and food distributors. It will also offer custom processing and packaging to farmers across the Midwest. The new plant is expected to process 50 head-per-day and create 45 to 50 new jobs for the region.

### Customer service in Osage

S&S Meats & Spirits has a vending machine filled with meat products that are available to the community of Osage all year. No matter if the shop is open, this vending machine offers a rotating stock of beef sticks, bacon, cured pork and other locker-made products. In addition to the vending machine, they offer curbside pick up and meat bundles for customers who may not have the finances or freezer space to buy a half or quarter of beef or pork. The meat bundles provide a larger selection of meat at a reduced per pound price. Throughout COVID-19 shutdowns, S&S owners and staff used social media to stay connected with customers.

### Mobile meat processing in Hull

Old Parlor Meat Company is a custom meat-processing business with a unique twist – its mobile unit travels to livestock when it is

time for slaughter. Bringing the processing facility to the farm saves time and is less stressful for the animals. The carcass is brought back to a permanent location on the Van Grouw family farm between Rock Valley and Hull, where meat can be aged, cut, trimmed and packaged to customers’ specifications.

### Program expands market opportunities

In May 2020, the Iowa Department of Agriculture and Land Stewardship adopted the Cooperative Interstate Shipment (CIS) Program, designating Iowa as the seventh state to enter the program. CIS allows meat processed at state-inspected plants to be sold outside of Iowa. To qualify for the program, a meat processor must have less than 25 full-time employees and comply with all federal food safety, sanitation and facility regulations.

This means that livestock producers can sell their meat and poultry across state lines if processed at a CIS facility. Before this program, farmers had to use a USDA-inspected facility to sell out of state, but small and mid-sized livestock farms could rarely

access those plants due to volume requirements and logistics tailored to larger producers. The CIS program allows farmers to grow their business, move more products and access new markets. It also gives consumers more access to Iowa-raised processed meats.

“Local meat lockers play an important role in their communities and the food supply chain,” says Iowa Secretary of Agriculture Mike Naig. “We pursued the CIS program to help small Iowa businesses grow and give consumers more access to Iowa-grown meat and poultry products.”

Story City Locker was Iowa’s first meat processor to be approved for the CIS program. They originally were interested in the CIS program to fill a 15% lag in their schedule, but with COVID-19-related product demand, the locker quickly gained traction and experienced a 25% increase. Story City Locker is now booking well into 2022 for custom processing. Being approved for the program has positioned the locker well for future growth. ⚡

Kay Snyder is the director of marketing and communications for the Iowa Area Development Group.

## SAFETY MATTERS

## STORM IQ: Do you know what to do?

The smell of spring is in the air, but so is the threat of severe weather and tornadoes. In Iowa, both May and June are peak months for tornadoes due mainly to the greatest contrast between the cold air of winter and the warm, moist air of the approaching summer. Iowa experiences an average of 50 tornadoes annually and is counted among the top 10 states with the highest incidents.

According to the Iowa State University Department of Agronomy, the most likely time to spark a tornado in Iowa is 6 p.m.; there are very few before noon and after 10 p.m. No matter what time a tornado may strike, it's essential to be prepared. Here are a few tips to remember:

- 1. Touch base with family members who aren't home.** Make sure they are aware of the severe weather threat and have a plan for keeping themselves safe.
- 2. Make sure your cell phone, iPad or other electronic communication devices or portable power banks are fully charged.**
- 3. DO NOT call 9-1-1 to report power outages.** Call Guthrie County REC at 888-747-2206 if your power goes out or you see a downed power line. Calling 9-1-1 to report non-emergency issues like service outages can take resources away from other emergencies.
- 4. Turn off lights and appliances, except for the refrigerator and freezer.** When the power comes back on, there may be a momentary surge or spike that can damage equipment.
- 5. Leave one light on so you will know when the power comes back on.** Wait at least 15 minutes after power is restored to turn on other appliances. ⚡

## IN THE COMMUNITY

## Guthrie County REC supports local daycare and preschool with RLF Loan

The plans to expand the building and services of Little Panther Daycare & Preschool in Panora received a boost recently from Guthrie County REC that will allow construction to begin immediately.

In addition to financial support from the State of Iowa and local community investment, Little Panther will receive a 0% interest loan of \$150,000 from Guthrie County REC and a \$100,000 loan from Panora Telco, another cooperative.

According to Guthrie County REC CEO Cozy Nelsen, Little Panther was one of the original recipients of the REC's Revolving Loan Fund (RLF) 20 years ago.

"When our RLF was established in 2001, this daycare was one of the initial projects," Nelsen says. "To see its continued success is a testament to the commitment of its board members, employees, and the community to Little Panther Daycare. Guthrie County REC is

proud to stay involved and lend our RLF funds to Little Panther Daycare for this much-needed expansion."

Little Panther will soon break ground on a 1,440-square-foot expansion of its existing building to accommodate 15 more children and two additional full-time employees. The expansion is needed to accommodate a long waiting list for childcare at the center. A capital campaign for matching grant funds is underway.

Little Panther is a nonprofit organization founded in Panora in 2002 by a group of parents and community advocates who recognized the need for additional quality childcare in Guthrie County. Today, the center serves 39 families and an average of 54 children per day from ages 4 weeks up to 12 years old. Little Panther employs 11 full-time and 9 part-time employees, including teachers, assistants and food service professionals. ⚡

# Three ways to save energy outdoors

BY PAT KEEGAN AND BRAD THIESSEN

The deck often becomes the kitchen during summer months. While you may have invested a lot of time and effort making the interior of your home more energy efficient, there are ways to also take those saving outdoors. Here are three ways to save energy outdoors this summer.

## 1 Pumps and maintenance

Many homes have one or more pumps that service our yard or reside on our property. Pumps can supply water for a swimming pool, lawn and garden, septic system or well. It's easy to let maintenance slip, which cuts the pump's efficiency and shortens its life.

Maintaining pumps involves cleaning filters or checking oil and belts. If you have multiple pumps and need to hire a professional for assistance, try to do all the maintenance at once to reduce the overall cost. You may also want to consider replacing older pumps with energy efficient ENERGY STAR®-rated ones before they break down. While you're at it, check for leaks in the water lines, which make pumps work harder and longer.

## 2 Outdoor lighting

If you have security lighting, there's a good chance you can save a little energy. Some security lights can be 500 to 1000 watts. That's the equivalent of 40 to 80 indoor LED bulbs – quite a lot of energy! Adding timers, motion sensors and light sensors can reduce your bulb energy use. Plus, when you use your lights less often, your neighbors may appreciate a little less light pollution!

Switching to LEDs is another great strategy. Solar lights are also a good way to light walkways, a water feature or your deck – without having to buy any electricity at all.

Cooking all the courses on the grill eliminates the need to turn on the kitchen stove.

Solar landscape lighting is a popular outdoor lighting option, and they use natural energy from the sun.

Doing annual maintenance on outdoor pumps, like the swimming pool pump shown here, can make it more energy efficient.

## 3 Grilling

Using your oven can raise your kitchen's temperature up to 10 degrees F, increasing the need to run your air conditioner, so grilling outdoors is a great way to save energy. If you like to barbecue or grill most of your meals, you may want to consider the fuel you use. If natural gas is available, it's usually much less expensive than propane. Natural gas is also convenient because you don't have to refill any tanks. On the downside, if you don't already have gas lines running to your patio or deck, the cost of installing them can be prohibitive.

Other fuel types like charcoal briquettes or wood take more preparation and can be fussy to work with, and charcoal grills emit three times as much carbon as gas grills.

Whichever fuel type you choose for your grill, you can save energy by barbecuing (rather than grilling because barbecuing keeps the lid closed during cooking).

Hopefully these ideas will help you enjoy your outdoor living space this summer – and help you save energy! ⚡

# Nominate a community volunteer by June 30!

## Step 1:

Go to [www.IowaShineTheLight.com](http://www.IowaShineTheLight.com) from June 1-30 to make a nomination and to review the contest rules.

## Step 2:

As a nominator, provide your contact information and answer the following question in 500 words or less.

**How has your nominee made a positive difference in the community, and why do they deserve to be recognized?**

### It's time to nominate a community volunteer!

Iowa's electric cooperatives are excited to announce a new statewide contest, which celebrates our cooperative commitment to community. Called **Shine the Light**, the contest will accept nominations in June and award three winners with a \$1,500 check to their local charity or community organization.

"We're excited to launch this cooperative effort to shine the light on local volunteers," says Erin Campbell, director of communications for the Iowa Association of Electric

Cooperatives. "So many people throughout the areas served by Iowa's electric cooperatives deserve to be recognized for making a positive impact."

Sponsored by the Touchstone Energy Cooperatives of Iowa, the Shine the Light contest will accept contest entries online during the month of June. The three winners will be announced during the Iowa State Fair in August. In addition to receiving a \$1,500 donation for their charity or nonprofit of choice, the winners will also be featured in the September issue of *Living with Energy in Iowa* magazine.

### How to nominate

Member-consumers and employees of Iowa's electric cooperatives are eligible to nominate local volunteers. If you receive electricity from an electric cooperative in Iowa, you're a co-op member-consumer and invited to nominate someone who is making a positive impact in the community. The volunteer being nominated does not need to be a co-op member-consumer. Minors may be nominated with consent from their parents or legal guardians. ⚡

# INSIDE A REAL-LIFE FARMHOUSE

BY VALERIE VAN KOOTEN

It's impossible not to notice the farmhouse decorating craze has taken over. On Instagram, you're invited to vote for your favorite farm kitchens. In magazines, you have an opportunity to win the items pictured in the spread. On home decorating TV shows, you can hold your phone camera up to the screen to find out where to buy the items featured.

I often chuckle when viewing these glossy creations. In my opinion, not one of those houses has come within 100 miles of a real farm. How do I know?

Both Kent and I grew up in farmhouses on real farms with real animals and crops and buildings. And we know that a real farmhouse contains the following at one time or another:

- **A mud porch or breezeway.** Now, that's not to say that some of these illustrious houses don't sport those as well, but a real farmhouse has a spot for mud-encrusted boots sitting on a scrap of rug or some newspapers. It holds an old refrigerator full of animal serums and other veterinary medicines. Syringes for administering the meds litter the countertops, along with a variety of work gloves. On the floor is a gunny sack or an old box with bulbs that haven't yet been planted and starts of the neighbor's flowers that need to get in the ground.
- **Evidence of animals in the house.** This is in addition to any pampered pet you may have roaming the premises. Real farmhouses are known to harbor piglets in a bushel basket behind the oil burner stove or a calf born too early in cold temperatures lounging in the bathtub. Real farmhouses have a bucket of eggs that have been recently gathered but still retain evidence of their origins clinging to the shells.

- **A pile of farm publications.** The pile starts in the kitchen and expands from the desk to the floor to beside the rocking chair. Not the carefully placed and curated tomes that the photographers want you to see. These include the oldies that your grandfather also read to the new ones that propose more modern methods of agriculture to those catering to the women in the family. There's 4-H information mixed in, along with the local shopper, open to an upcoming auction bill. You will notice that some of these publications have gaping squares, where a recipe or a phone number was clipped out and stuck inside the cupboard door.
- **A less-than-picturesque laundry room.** The laundry room in a real farmhouse isn't the neatly ordered shelves, clean appliances and cheery oversized words

tacked on the wall that you'll see in these various media. Instead, it has filthy, grease-encased blue jeans in a heap on the floor. In a sink next to the washer, soak ancient towels used to stanch the bleeding of the dog, who had wandered into some sort of scrape with a larger animal and is bearing the wounds to prove it. The detergents piled on top of the dryer are all extra heavy-duty grease lifters, bleaches and soda-based concoctions to get rid of the smells.

So, I'll smile and give a condescending glance at the farmhouses that are proffered for my decorating wants. And then I'll wonder how a pile of dirty blue jeans would look in that magazine spread. ⚡
